

## Actuarial Valuation Report

## State of Nevada

State of Nevada Postretirement Health and Life Insurance Plan
For the Fiscal Year Ending June 30, 2022
Measurement Date July 1, 2021

## Introduction

This report documents the results of the actuarial valuation for the fiscal year ending June 30, 2022 of the State of Nevada Postretirement Health and Life Insurance Plan for the State of Nevada. The plan is a single-employer plan and does not issue a separate financial statement. As a result, all reporting requirements are included in the employer's financial statement. These results are based on a Measurement Date of July 1, 2021. The information provided in this report is intended strictly for documenting information relating to company and plan disclosure and reporting requirements.

Determinations for purposes other than the financial accounting requirements may be significantly different from the results in this report. Thus, the use of this report for purposes other than those expressed here may not be appropriate.

This valuation has been conducted in accordance with generally accepted actuarial principles and practices, including the applicable Actuarial Standards of Practice as issued by the Actuarial Standards Board. In addition, the valuation results are based on our understanding of the financial accounting and reporting requirements under U.S. Generally Accepted Accounting Principles as set forth in Government Accounting Standards Board Statement 75 (GASB 75) including any guidance or interpretations provided by the Company and/or its audit partners prior to the issuance of this report. The information in this report is not intended to supersede or supplant the advice and interpretations of the State of Nevada's auditors. Additional disclosures may be required under GASB 74.

A valuation model was used to develop the liabilities for this valuation. The valuation model relies on ProVal software, which was developed by Winklevoss Technologies, LLC. Experts within Aon selected this software and determined it is appropriate for performing valuations. We coded and reviewed the software for the provisions, assumptions, methods, and data of the State of Nevada Postretirement Health and Life Insurance Plan.

The valuation model outputs various cost scenarios. The " $1 \%$ increase" and " $1 \%$ decrease" interest rate scenarios vary only the discount rate assumption, in order to illustrate the impact of a change in that assumption in isolation. In practice, certain other assumptions would also be expected to vary when the discount rate changes. Therefore, the output from these scenarios should be used solely for assessing the impact of the discount rate in isolation and may not represent a realistic set of results for other purposes.

The " $1 \%$ increase" and " $1 \%$ decrease" healthcare cost trend scenarios vary only the healthcare cost trend assumption, in order to illustrate the impact of a change in that assumption in isolation. Therefore, the output from these scenarios should be used solely for assessing the impact of the healthcare cost trend in isolation and may not represent a realistic set of results for other purposes.

Models are used to estimate underlying per capita medical and prescription drug claims costs, subsequently utilized as assumption inputs for valuation models used to develop the liabilities for the 2020 and future valuations. Models are also used to develop underlying future trend rates for Medical plans. The Aon consulting team leveraged expertise of Health experts within Aon as it relates to reviewing the models used for development of the per capita claims costs and future trend rates.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to (but not limited to) such factors as the following:

- Plan experience differing from that anticipated by the economic or demographic assumptions;
- Changes in actuarial methods or in economic or demographic assumptions;
- Increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period); and
- Changes in plan provisions or applicable law.

Due to the limited scope of our assignment, we did not perform an analysis of the potential range of such future measurements.

Funded status measurements shown in this report are determined based on various measures of plan assets and liabilities. For entity and plan disclosure and reporting purposes, funded status is determined using plan assets measured at market value. Plan liabilities are measured based on the interest rates and other assumptions summarized in the Actuarial Assumptions and Methods section of this report.

These funded status measurements may not be appropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the plan's benefit obligations, and funded status measurements for State of Nevada and plan disclosure and reporting purposes may not be appropriate for assessing the need for or the amount of future contributions. In conducting the valuation, we have relied on personnel, plan design, health care claim cost, and asset information supplied by State of Nevada as of the valuation date. While we cannot verify the accuracy of all the information, the supplied information was reviewed for consistency and reasonableness. As a result of this review, we have no reason to doubt the substantial accuracy or completeness of the information and believe that it has produced appropriate results.

The actuarial assumptions and methods used in this valuation are described in the Actuarial Assumptions and Methods section of this report. State of Nevada selected the economic and demographic assumptions and prescribed them for use for purposes of compliance with GASB 75. Aon provided guidance with respect to these assumptions, and it is our belief that the assumptions represent reasonable expectations of anticipated plan experience.

The undersigned are familiar with the near-term and long-term aspects of OPEB valuations and collectively meet the Qualification Standards of the American Academy of Actuaries necessary to render the actuarial opinions contained herein. The information provided in this report is dependent upon various factors as documented throughout this report, which may be subject to change. Each section of this report is considered to be an integral part of the actuarial opinions.

To our knowledge, no colleague of Aon providing services to State of Nevada has any material direct or indirect financial interest in State of Nevada. Thus, we believe there is no relationship existing that might affect our capacity to prepare and certify this actuarial report for State of Nevada.

## Plan Provisions

Eligibility

Medical and Rx Benefits

- Pre-Medicare Retires
- Medicare Retirees

For a retiree to participate in the PEBP program, the participant must be receiving a PERS, LRS, JRS, or RPA benefit. PERS eligibility requirements vary by employee group and benefit type. Actives hired after December 31, 2011 are not eligible for any subsidy from PEBP. In addition, actives hired after December 31, 2009 and who retire with less than 15 years of continuous service (except a disability retirement) are not eligible for a subsidy from PEBP.

Normal Retirement-Regular Employees

- Minimum age of 65 with $5+$ years of service
- Minimum age of 60 with $10+$ years of service
- Minimum 30 years of service, regardless of age

Normal Retirement-Police \& Fire Employees

- Minimum age of 65 with $5+$ years of service
- Minimum age of 55 with $10+$ years of service
- Minimum age of 50 and 20+ years of service
- Minimum 25 years of service, regardless of age

Disability Benefit

- Minimum 5 years of service, regardless of age

Reduced Benefit

- Minimum 5 years of service, regardless of age

For this valuation, Regular Employees were considered eligible for retirement at a minimum age of 50 with 5 years of service and Police \& Fire Employees were considered eligible for retirement at a minimum age of 45 with 5 years of service.

Surviving spouses are not eligible to receive post-Medicare benefits.

For retirees with younger spouses, retirees and spouses will move to the Exchange once the spouse becomes Medicare eligible (age 65). For retirees with older spouse, retirees and spouses will both move to the Exchange when the retiree becomes Medicare eligible.

Certain retirees over age 65 are not eligible for Medicare Part A as indicated on the data. For these participants, we have assumed they will not become eligible for Medicare Part A at any time in the future. Current active employees are assumed to be eligible for Medicare Part A. Medicare eligible retirees will go to the Exchange.

Medical and Rx Benefits

- Terminated Vesteds
- Current Actives

Dental Benefits

Life Insurance Benefits

HRA Benefit

If service is less than 10 years, Terminated Vested (TVs) participants are assumed to retire at age 65 and go directly to the Exchange. If service is ten years or more, TVs are assumed to retire at age 60 and move to the Exchange in the same manner as actives outlines above.

Actives enrolled in the CDHP are assumed to participate in this plan upon retirement. It is assumed $5 \%$ of pre-Medicare actives enrolled in the HPN Plan will participate in the CDHP upon retirement. Likewise, it is assumed $20 \%$ of pre-Medicare actives enrolled in the HTH Plan will participate in the CDHP upon retirement. The balance of the HMO populations will remain in the HMO plan as early retirees. These assumptions were based upon actual PEBP census. For all plans, when actives retire and then reach age 65, it is assumed they become Medicare eligible. Once both the participant and spouse become Medicare eligible, it is assumed they will both participate in the Exchange.

Pre-Medicare retirees will participate in PEBP's Dental Plan. Those enrolled in the EHPD plan will assume to enroll in PEBP's dental plan. For those future Exchange retirees, we assume $55 \%$ will participate in PEBP's Dental program.

If you participate in a PEBP medical plan, your benefits include $\$ 12,500$ life insurance. Zero retiree contributions have been assumed for the life insurance. The life insurance retiree contribution for nonMedicare retirees is included in the medical premium. For Medicare retirees, the premium is paid by PEBP.

The following monthly amount will be credited on behalf of Medicare Eligible Retirees, effective July 1, 2020 :

- For those who retired prior to January 1, 1994, the dollar amount is equal to \$195 (previously was \$180).
- For those who retired on or after January 1, 1994, the dollar amount is equal to the base amount (\$13) multiplied by the years of service credit up to a maximum of 20 years of service. Prior to this plan year, the base amount was $\$ 12$.

Part B Premium

Administrative Fees
(Per Employee Basis)

HRA Account Reversions

The State of Nevada pays the Part B premium for eligible participants in the CDHP and HMO Plans. If not specifically indicated on the data, it is assumed any retiree over age 65 and participating in these plans will receive the Part B premium and the State pays the premium. For retirees indicated on the data file as eligible for Part $B$, it is assumed they will receive the Part B premium subsidy. The Part B premium subsidy in effect for 2020 calendar year is $\$ 135.50$ per month.

Effective as of January 1, 2020

- CDHP: \$672.12
- HMO: \$673.68
- Pre-65 CDHP: 5.0\%
- Medicare HRA: 0.5\%

## Health Care Claims Development

On March 23, 2010, the "Patient Protection and Affordable Care Act" was signed into law, followed by the passage of the "Health Care and Education Affordability Reconciliation Act of 2010" on March 30, 2010 ("Acts"). The health care reforms contained in these Acts have wide-spread impact on health care programs, including those covering retirees. This valuation reflects Aon's interpretation of the Acts based on information currently available. Future regulations on each aspect of the Acts may be different than Aon's initial interpretations.

Key issues in Health Care Reform that have an effect on the valuation include:

- Excise tax on high-cost health plans
- Group market reforms
- Early Retiree Reimbursement Program
- Taxation of Retiree Drug Subsidy for post-65 coverage

The valuation issues related to each of these topics are discussed below.

## Health Care Reform Excise Tax Adjustment:

The "Further Consolidated Appropriations Act, 2020" signed into law on December 20, 2019, included a permanent repeal of the excise tax on high-cost plans (a.k.a. "the Cadillac tax") originally imposed by the Affordable Care Act in 2010. As a result, there is no impact from the excise tax in the valuation.

## Group Market Reforms

- Requirement to Cover Children to Age 26
- The Acts requires that a group health plan that provides dependent coverage of children shall continue to make such coverage available for an adult child until the child turns 26 years of age. Current and future dependent children are valued implicitly in the valuation. Per capita claims costs were developed using claims information for all covered lives and adult headcounts. As such, the impact of child coverage is built into the per capita claims for retirees and spouses.
- Elimination of Benefit Limitations
- The Acts include a number of other provisions that may increase the cost of retiree health care including the elimination of lifetime maximum benefits and "restrictive" annual benefit limitations. We have made no adjustment for these additional benefits because there are no material limits in the plans.

Medicare Part D reimbursements and the Early Retiree Reinsurance program do not fall under GASB 75.

## Claims Cost Development

The first step in determining the liabilities under a postretirement welfare plan is to calculate the expected average claims cost per participant in the coming year. The preliminary per capita costs were developed as follows:

- The average medical/Rx and dental per capita claims costs were developed from the fiscal year 2021 premium rates for the HMO plan and premium-equivalent rates for the other plans.
Premium/premium-equivalent rates were provided by the State of Nevada health pricing actuary. The
expected medical/Rx and dental per capita "adult-equivalent" claims costs were based on the respective active, pre-65 retiree, and non-Medicare eligible post-65 retiree enrollment weighted average of the four-tier rate structure including the cost of dependent children as provided by the State of Nevada, and were already centered at the mid-point of the annual period following the valuation date. Average medical/Rx per capita claims costs were then age-adjusted based on the demographics of the population, and the assumed health care aging factors shown in the table below. Average dental per capita claims costs were not adjusted for aging.
- Participants who are eligible for Medicare Part A and not yet eligible to participate in the retiree medical exchange are assumed to experience per capita costs $50 \%$ lower than post65 participants not eligible for Medicare Part A.
- Fiscal year 2021 per capita administrative costs are assumed to be $\$ 432$ and $\$ 485$ for CDHP and HMO, respectively. Administrative expenses were based on actual fiscal 2021 administrative costs, converted to a per member per year rate.

Models are used to estimate underlying per capita medical, prescription drug, and dental claims costs, subsequently utilized as assumption inputs for valuation models used to develop the liabilities for the 2020 and future valuations. The Aon consulting team leveraged expertise of Health experts within Aon as it relates to reviewing the models used for development of the per capita claims costs and future trend rates.

The sample per capita medical/Rx and dental claims cost assumptions shown below by age, benefit, and plan represent the true underlying baseline experience for non-Medicare eligible participants, not including administrative expenses, estimated for the State of Nevada's sponsored postretirement benefits and costs. These rates are used in the expense calculation for the period 7/1/2020-6/30/2021 and disclosures as of $6 / 30 / 2021$.

## Actuarial Assumptions and Methods

The actuarial assumptions and methods used in the June 30, 2022 valuation are stated below.

## Actuarial Assumptions and Methods

| Health Benefits Participation | $90 \%$ of current eligible actives and $60 \%$ of current terminated vested employees will elect retiree plan coverage. Additionally, $60 \%$ of future retirees who have declined coverage are assumed to elect to participate in the plan upon retirement. $60 \%$ of actives decremented to withdrawal from the plan with at least five years of service will elect retiree medical and dental coverage. |
| :---: | :---: |
| Life Insurance Participation | All active employees and current retirees that elected healthcare coverage. Reinstated retirees and survivors are not eligible to receive the life insurance benefit. |
| Plan Election Percentage | Future retiree election percentage is based on the current retiree plan enrollment distribution. |
| Demographic Assumptions | Census data was provided by the State and adjustments were made for missing data, which have an insignificant effect on the liability. |
|  | The census provided did not include gender for every terminated vested participant, so it was assumed that the percentage of males among the terminated vested population is consistent with the percentage of males among the retiree population. |
|  | All actives are assumed to accumulate State service only. A factor has been applied to total service for State and Non-State retirees which represents the percentage of a retiree's total service that is attributable to service with the State: |
|  | - State: 94\% |
|  | - Non-State Retiree: $13 \%$ |
| Spouse Age Difference \& Marriage Percentage | Male participants are assumed to be four years older than spouses; female participants are assumed to be two years younger than spouses. |
|  | $30 \%$ of active males and $15 \%$ of active females will elect retiree spouse coverage. |

## State of Nevada

## Postretirement Health and Life Insurance Plan

-Employer Allocation of Estimated Implicit Subsidy

The implicit subsidy was estimated based on the ratio of the blended pre-65 retiree premiums to the full cost pre-65 retiree premiums as determined by the Plan's heath care actuary, and the projected gross pre-65 retiree costs from the fiscal 2021 and fiscal 2022 GASB 75 actuarial valuations.

Employer allocations are based on the employer contributions provided by the State for the "measurement" period applicable to each fiscal year.
Please see the fiscal 2021 and fiscal 2022 actuarial valuation reports for a summary of the census data, plan provisions, and actuarial assumptions used in the calculations.

[^0]:    ${ }^{1}$ GASB 75 was effective first for employer fiscal years beginning after June 15, 2017

[^1]:    ${ }^{1}$ Active counts reflect those hired prior to January 1, 2012.
    ${ }^{2}$ Inactive counts include terminated vested participants.
