PUBLIC EMPLOYEES' BENEFITS PROGRAM BOARD
TRANSCRIPT OF PROCEEDINGS
VIDEOCONFERENCED OPEN MEETING
THURSDAY, MARCH 20, 2025
CARSON CITY, NEVADA

The Board: JOY GRIMMER, Chairperson
MICHELLE KELLEY, Vice Chair
JIM BARNES, Member
JENNIFER MCLENDON, Member
JANELL WOODWARD, Member
THERESA CARSTEN, Member
LAURA RICH, Member

For the Board: RADHIKA KUNNEL, Deputy
Attorney General
BRANDEE MOONEYHAN, Lead
Insurance Counsel

For Staff: CELESTENA GLOVER
Executive Officer
NIK PROPER
Operations Officer
MICHELLE WEYLAND
Chief Financial Officer
LESLIE BITTLESTON
Quality Control Officer
JESSICA CRANE
Executive Assistant

1 THURSDAY, MARCH 20, 2025, 9:07 A.M.

2 ---oOo---

3 CHAIRPERSON GRIMMER: Good morning, everyone.

4 This is the Public Employees Benefits Program meeting on
5 March 20th, 2025, at 9:00 a.m. We're conducting this meeting
6 virtually. I would like to call the meeting to order. Would
7 staff please call the roll.

8 MS. CRANE: Good morning. Thank you. Board
9 Chair Grimmer.

10 CHAIRPERSON GRIMMER: Here.

11 MS. CRANE: Michelle Kelley.

12 MEMBER KELLEY: Present.

13 MS. CRANE: Jim Barnes.

14 MEMBER BARNES: Here.

15 MS. CRANE: Jennifer McClendon.

16 MEMBER MCCLENDON: Here.

17 MS. CRANE: Janell Woodward.

18 MEMBER WOODWARD: Here.

19 MS. CRANE: Theresa Carsten.

20 MEMBER CARSTEN: Present.

21 MS. CRANE: Laura Rich.

22 MEMBER RICH: Here.

23 MS. CRANE: Betsy Strasburg. Okay. It appears
24 Betsy is absent. But we do have a quorum. Please remember
CAPITOL REPORTERS (775) 882-5322

1 to state and spell your name before speaking for our
2 transcriber.

3 CHAIRPERSON GRIMMER: Okay. Thank you. We will
4 move on to Agenda Item Number 2, public comment. Public
5 comment will be taken during this agenda item. No action may
6 be taken on any matter raised under this item unless the
7 matter is included on a future agenda as an item on which
8 action may be taken. Comments may be limited to three
9 minutes per person at the discretion of the chairperson. Can
10 you please put up the slide. Thank you.

11 MR. HOPKINS: Yes, Madam Chair. I have the slide
12 up and I'll make my announcement real quick. It looks like
13 we have four people in the lobby at the moment.

14 CHAIRPERSON GRIMMER: Okay. Perfect. Go ahead.

15 MR. HOPKINS: If you would like to call in to
16 provide public comment, please dial area code (669)900-6833,
17 and then when prompted to provide your meeting ID, please
18 enter 867 2016 1489 and then press pound. When prompted for
19 the participant ID, please enter pound. During the Zoom
20 meeting -- Joining the Zoom meeting as an attendee is for
21 making public comment only. If you do not wish to make
22 public comment, please leave the Zoom meeting now, so you're
23 not accidentally called upon. Please feel free to watch it
24 via the YouTube live stream on the PEBP YouTube channel. The
CAPITOL REPORTERS (775) 882-5322

1 link for the live stream is located on the agenda.

2 For those who have joined for public comments,
3 your name or the last four digits of your phone number will
4 be announced and you will be advised you have been unmuted.
5 Please slowly state and spell your name for the record if you
6 wish to make public comment.

7 Caller with the last four digits 6837, please
8 press star six to unmute and please fully state and spell
9 your name for the record.

10 MR. ERVIN: This is Kent Ervin, E-r-v-i-n, with
11 the Nevada Faculty Alliance, the statewide association of
12 professional employees at our public colleges and
13 universities.

14 Good morning, Chair Grimmer and Members. The
15 rate setting meeting at PEBP is one of the most important of
16 the year. Board members have a fiduciary duty to balance the
17 benefits and costs of the plan design in setting rates. This
18 year for the first time since the pandemic, the meeting is
19 not being held in person.

20 The board packet includes just two rate options
21 for the board to consider and no analysis whatsoever on the
22 two scenarios.

23 However, we support scenario one, which appears
24 to follow existing board policy on rate setting methodology.

CAPITOL REPORTERS (775) 882-5322

1 Scenario two arbitrarily raises employee premiums
2 above the actuarial requirements. With no reasons presented
3 to do so, that is simply punitive to our state employees
4 participants.

5 On the legislative bill review NFA opposes AB 22
6 and SB 52 as introduced which would alter the governance of
7 PEBP and reduce the authority of the board.

8 The Nevada Faculty Alliance supports AB 188,
9 restoration of retiree health benefits for post-2011 hires,
10 AB 169 to expand speech therapy treatments for minors and AB
11 349, which would cap PEBP claim statements, potentially
12 saving PEBP up to 36 million per year. A full analysis of AB
13 349 by PEBP is needed today determine the actual savings that
14 could be realized.

15 For AB 188 and AB 169, PEBP's fiscal notes are
16 highly exaggerated and should be reduced or withdrawn. Thank
17 you.

18 MR. HOPKINS: Thank you.

19 Doug Unger, you have permission to speak. Please
20 slowly state and spell your name for the record.

21 MR. UNGER: Doug Unger, D-o-u-g U-n-g-e-r, Acting
22 President, UNLV Chapter, Nevada Faculty Alliance, and member
23 of the UNLV Employee Benefits Advisory Committee. Thank you,
24 Chair Grimmer, Executive Officer Glover, and the PEBP board
CAPITOL REPORTERS (775) 882-5322

1 for your service and consideration.

2 March is rate-setting month. And this year,
3 which feels ever more economically challenging everywhere,
4 Agenda Item Number 6 feels more important for how best to
5 keep premiums low as possible for faculty and state
6 employees.

7 Reason: We'll all have a mandated 1.75 percent
8 increase in PERS and defined contribution retirement
9 deductions which will reduce take-home pay. Looking at the
10 possible scenario one versus scenario two of proposed rates
11 for possible action next year, no rationale is provided by
12 PEBP for the executive officer and the PEBP team to recommend
13 the higher premiums in scenario number two.

14 Both scenario one and two promise significant
15 monthly increases for state employees with families, though
16 individuals will see premiums either reduced a little or left
17 more or less flat. The difference between one and two means
18 a premium increase of 588 per year versus 888 per year for
19 the PPO, to look at just one plan, which is more than a small
20 sting when an increase of, say, \$1225 per year is also
21 deducted for retirement. That would mean \$176 per month
22 take-home pay reduction for an assistant professor or state
23 employee making \$70,000 per year with a family on the low
24 deductible PPO as an example. And this in a year when, due
CAPITOL REPORTERS (775) 882-5322

1 to draconian federal funding cuts to budgets that will affect
2 almost every conceivable work life occupation for state
3 employees, plus the anticipated higher inflation rate due to
4 federal tariff tax increases on imports that, by the way, I
5 can't find one single economist of sound mind recommending.
6 All of this is bound to cause additional collateral economic
7 distress for state employees and their families.

8 At least PEBP has the power to offer some relief
9 by choosing scenario number one for the lowest rates and
10 reducing the sting. Thank you for being mindful of this when
11 making the important rate setting decision.

12 Regarding Agenda Item Number 9, legislative
13 bills, I wish to point out that AB 188, which will restore
14 health benefit contributions for state employee retirees
15 hired after 2011, we believe will have a very minimal fiscal
16 impact, less than the 2.5 million guesstimate cited, and no
17 immediate fiscal impact whatsoever. The fiscal note is
18 really a hazarded guess added to a speculation about
19 additional staff.

20 AB 188 is the right thing to do, especially in
21 these uncertain times. Thank you.

22 MR. HOPKINS: Thank you, Mr. Unger.

23 Caller with the last four digits 0891, please
24 press star six to unmute and please slowly state and spell
CAPITOL REPORTERS (775) 882-5322

1 your name for the record.

2 MS. LAIRD: Thank you. Good morning, Chair
3 Grimmer and board members and staff. My name for the record
4 is Terri Laird, T-e-r-r-i L-a-i-r-d. I'm the executive
5 director of RPEN, a non-profit, non-partisan organization
6 founded nearly 50 years ago to protect the pension and health
7 care benefits they earned while promised at the start of
8 their careers.

9 RPEN has nearly 7,000 members, and the majority
10 are retired and in PEBP's Medicare exchange. And so it was
11 with great concern when we heard PEBP's former executive
12 officer and now board member, Laura Rich, who markets
13 your recent legislative board meetings that PEBP would have
14 more money to increase benefits for active participants in
15 PEBP if they can do health care benefits for retirees. This
16 is quite a surprise and very alarming and something RPEN is
17 very much opposed to for obvious reasons.

18 Ms. Rich has said Nevada is one of the few states
19 offering retiree benefits. Is there proof of this statement?
20 And how cruel would that be to take away these benefits when
21 they need it the most.

22 In addition, RPEN is on the record of being
23 opposed to those PEBP presented recently to the Nevada
24 legislature, AB 22 and SB 32, for reasons already shared
CAPITOL REPORTERS (775) 882-5322

1 about the proposed Nevada Health Authority and await more
2 information about the impact on active and retired public
3 employees. We do support AB 188 as mentioned also by
4 previous callers. And I thank you for your time and
5 statements.

6 MR. HOPKINS: Thank you.

7 Madam Chair, that concludes the public comment.
8 We have no one else in the lobby.

9 CHAIRPERSON GRIMMER: Okay. Thank you very much.

10 We will close Agenda Item Number 2 and go on to
11 Agenda Item Number 3, PEBP board disclosures for applicable
12 board meeting items. Deputy Attorney General Radhika Kunnel.

13 MS. KUNNEL: Thank you, Chair Grimmer.

14 Good morning, everyone. My name is Radhika Kunnel for the
15 record.

16 This agenda item is to allow me to make a
17 disclosure regarding conflicts of interest on behalf of the
18 board members who are eligible for Public Employee Benefits
19 Program.

20 Pursuant to NRS 281A.420 on behalf of the board
21 members who are eligible for the PEBP benefits or whose
22 families are eligible for PEBP benefits, I offer this
23 disclosure, that they will be voting on those items that may
24 affect the benefits available to them or their family

CAPITOL REPORTERS (775) 882-5322

1 members. The law does not require abstention from voting
2 merely because the board member or their family member is
3 eligible for PEBP benefits.

4 At this time, I invite any member of the board
5 who has any additional disclosures to make to make it now.
6 Thank you.

7 CHAIRPERSON GRIMMER: Okay. Seeing no other
8 disclosures, I will close Agenda Item Number 3 and move on to
9 Agenda Item Number 4, consent agenda. Consent items will be
10 considered together and acted on in one motion unless an item
11 is removed to be considered separately by the board.

12 Does anyone have any items to be pulled? Yes,
13 Ms. Kelley.

14 MEMBER KELLEY: Michelle Kelley for the record.
15 Could we pull 4.3.8? I just have a quick question regarding
16 that agenda item.

17 CHAIRPERSON GRIMMER: Okay. Okay. Are there any
18 others? Okay. Seeing none, do I have a motion to approve
19 everything but 1.3.8?

20 MS. GLOVER: It's 4.3.8.

21 CHAIRPERSON GRIMMER: Four? I'm sorry. Okay.
22 Sorry. I couldn't hear you. Okay. 4.3.8. Do I have a
23 motion to approve everything but 4.3.8?

24 MEMBER KELLEY: Michelle Kelley. I make a motion
CAPITOL REPORTERS (775) 882-5322

1 to approve the consent agenda item except for Item 4.3.8.

2 CHAIRPERSON GRIMMER: Okay. Do I have a second?

3 MEMBER BARNES: This is Jim Barnes. I second
4 that motion.

5 CHAIRPERSON GRIMMER: Okay. Any further
6 discussion? Okay. Seeing none, I'll call for the vote. All
7 of those in favor signify by saying aye.

8 (The vote was unanimously in favor of the motion)

9 CHAIRPERSON GRIMMER: All of those opposed?
10 Okay. Motion carries.

11 Can we please have someone present on 4.3.8
12 please.

13 MEMBER KELLEY: Chair Grimmer, I just actually
14 have a quick question.

15 CHAIRPERSON GRIMMER: Okay. Go ahead.

16 MEMBER KELLEY: Thank you. So I noticed that
17 there was a public comment about, once again, Carson-Tahoe,
18 the stepchild in Carson City. And I just wonder if
19 Ms. Bittleston perhaps -- I think this was her agenda item --
20 can talk about if there's been any analysis done on our
21 retirees in Medicare Advantage access to Carson-Tahoe in
22 Carson City and/or through the Medicare Advantage program
23 and/or if we can get such an analysis done to see which
24 health insurance programs are still -- still offer

CAPITOL REPORTERS (775) 882-5322

1 Carson-Tahoe as in network.

2 MS. BITTLESTON: Leslie Bittleston for the
3 record. No, we have not conducted such an analysis at this
4 point, but more than willing to do so. One thing that was
5 conducted and presented at the last board meeting was a audit
6 of a small percentage of claims that was presented by CTI at
7 the last board meeting. And, I can't remember, my apologies,
8 off the top of my head, the results of that audit from the
9 last board meeting. But we can do an analysis of who was --
10 who Carson-Tahoe is accepting and have that ready for the
11 next board meeting.

12 CHAIRPERSON GRIMMER: Thank you.
13 Ms. Rich.

14 MEMBER RICH: Thank you, Chair. I just wanted to
15 point out that while I think that PEBP has a -- there's a
16 great offer with the Medicare Exchange platform in terms of,
17 you know, the customer service that is provided to our
18 retirees, but, you know, just to reenforce what's been said
19 on public comment, by forcing them to use that platform and
20 tying them to the Medicare Exchange rather than allowing them
21 to get their health care coverage through any plan they wish,
22 you know, that we do have these problems, right.

23 And so there might be something that, you know,
24 PEBP might want to look in to opening it up. I know in the
CAPITOL REPORTERS (775) 882-5322

1 past it has been discussed and I know, you know, the benefits
2 are that there's things that through the Medicare Exchange we
3 have things like the automatic reimbursements and things like
4 that. And then you can also handle and oversee the customer
5 service and things of that sort.

6 But, on the flip side, you are completely, you
7 know, forcing the retirees to use that platform and not
8 looking at other options. So, it's just something that, you
9 know, maybe that's another analysis that needs to be done.

10 CHAIRPERSON GRIMMER: Thank you.

11 Nik, please go ahead.

12 MR. PROPER: Nik Proper, Operations Officer, for
13 the record. Vice Chair Kelley, excuse me, we were confirmed
14 that Prominence and Senior Care Plus will remain in network
15 for Carson-Tahoe.

16 CHAIRPERSON GRIMMER: Okay. Thank you for that.

17 Michelle, did you have a -- Go ahead.

18 MEMBER KELLEY: Yes. Thanks so much, Mr. Proper.
19 I just wonder is someone going to follow up with Mr. Wagner
20 who made public comments saying he couldn't find any
21 Advantage plans that were accepting Carson-Tahoe anymore. If
22 there are insurances that he could select, if that facility
23 is important to him, I think it would be great to let him
24 know if we can. Thank you.

CAPITOL REPORTERS (775) 882-5322

1 MR. PROPER: Nik Proper, Operations Officer for
2 the record. Yes, absolutely, we can do that and just confirm
3 that yes there are some Medicare Advantage plans that will
4 remain in network.

5 MEMBER KELLEY: I appreciate that.

6 CHAIRPERSON GRIMMER: Thank you for that.

7 Okay. Anything else? Okay. Seeing nothing, we
8 will close this item and move on to -- or I'm sorry. Can we
9 take a vote on Agenda Item 4.3.8? Do I have a motion?

10 MEMBER KELLEY: Michelle Kelley here. I'll make
11 a motion to accept Agenda 4.3.8 as presented.

12 CHAIRPERSON GRIMMER: Thank you. Do I have a
13 second?

14 MEMBER RICH: Laura Rich. Second.

15 CHAIRPERSON GRIMMER: Thank you. Okay. Any
16 further discussion? Okay. Seeing none, all of those in
17 favor signify by saying aye.

18 (The vote was unanimously in favor of the motion)

19 CHAIRPERSON GRIMMER: All of those opposed?
20 Okay. Motion passes.

21 We will close Agenda Item Number 4 and go on to
22 Agenda Item Number 5, executive officer report. Celestena
23 Glover, Executive Officer. Information and discussion only.
24 Thank you.

CAPITOL REPORTERS (775) 882-5322

1 MS. GLOVER: Good morning. This is Celestena
2 Glover, Executive Officer for PEBP. The executive officer
3 report just gives you a basic overview of what has been
4 happening. Obviously the staff and our vendor partners have
5 been extremely busy with responding to fiscal notes for the
6 many bills that are coming out. It seems like every 30
7 seconds we get another request.

8 So far during this legislative session, PEBP has
9 presented their budget. That was done on February 14th. We
10 presented to the full Joint Committee, Senate Finance and
11 Assembly Ways and Means. There were a lot of questions on
12 the presentation. Many of them were around the cost of the
13 plan, what our plan design and the timing. I made sure that
14 was included. What our steps are as far as the timing of
15 when various decisions are made and when we have to, you
16 know, make our final decisions.

17 They also had questions about Carson-Tahoe
18 leaving the network. I tried to explain the processes we're
19 going through. We did have -- One of the committee members
20 had definite concerns about whether providers were being paid
21 sufficiently through the network and what we were doing to
22 address it.

23 We are releasing the RFP for the secondary
24 network. We've had it ready to go. It's been in
CAPITOL REPORTERS (775) 882-5322

1 Purchasing's hand. I'm not sure at this point. They have
2 some additional questions that we're trying to get answered.
3 So hopefully that can get resolved and that can get posted
4 soon because we're really running out of time to implement a
5 secondary vendor and there's a lot of moving parts when we
6 bring in a second network to coordinate between the TPA and
7 the vendors.

8 So I tried to answer those questions the best way
9 I could. And I also let them know that as soon as that RFP
10 was available I would provide copies to their staff so that
11 they could see what was going on.

12 We also presented on Senate Bill 32 on February
13 19th and Assembly Bill 22 on February 21st. Those were just
14 presentations for introduction of the bill. There's been no
15 work sessions. And so far we have not seen any follow-up
16 meetings for those bills.

17 And then future board meetings we're looking at
18 starting up in-person meetings again in May. Obviously if we
19 have board members that need to attend virtually, we will
20 accommodate their requirements based on their own schedules.
21 The May meeting is scheduled for May 22nd, 2025. That will
22 be here at the PEBP office. And we are planning on update
23 meetings for the legislative action in April and May. Right
24 now we have one scheduled for April 7, I believe. And May

CAPITOL REPORTERS (775) 882-5322

1 will be determined on everybody's availability and the need
2 for that meeting. If something comes up and changes the need
3 for the April 7th meeting, then we'll reschedule it to
4 another date if we have no further updates to provide the
5 board.

6 And, with that, I'll take any questions.

7 CHAIRPERSON GRIMMER: Are there any questions?
8 Okay.

9 Seeing none, we will close this item and move on
10 to Agenda Item Number 6, discussion and possible action to
11 include approving Plan Year 2026 rates for state and
12 non-state employees, retirees, and their dependants for the
13 consumer driven health plan, low deductible plan, exclusive
14 provider organization plan, and health maintenance
15 organization plan. Celestena Glover, Executive Officer. For
16 possible action. Please go ahead.

17 MS. GLOVER: Yes. Again, this is Celestena
18 Glover for the record. So we're going to take 6 and 6.1
19 together. I'm going to have Segal do the trend presentation
20 first and then we'll go through the tables that were provided
21 for potential rates and then answer any questions the board
22 has as we go along.

23 And, with that, I will turn it over to Richard
24 Ward from Segal. Thank you.

CAPITOL REPORTERS (775) 882-5322

1 MR. WARD: Good morning. Richard Ward for the
2 record. Sound check. Am I coming through okay? All right.
3 Is it alright if I share the slide for that report?

4 MR. HOPKINS: Yes. Go ahead, Richard. Thank
5 you.

6 MR. WARD: All right. For those of you that may
7 be following without visuals that have the full board packet,
8 there's about a 214-page differential between the pagination
9 in our report and the full board packet. So I believe I'm on
10 page 215 right now of the full board packet.

11 So, just to set the table here for what we're
12 going to review, we're going to review historic plan costs
13 and trends for PEBP versus the industry, actual versus
14 projected. We're also going to review the Segal health plan
15 cost trend survey for 2025 to get a broader market
16 perspective, and then a review of the methodology that's used
17 when we're developing market rates, developing the employee
18 premiums, both the methodology and the assumptions.

19 For summary here, this reviews medical, pharmacy,
20 and dental and we have here on the tables to the right PEBP
21 compared to the industry. The top right table is the last
22 three years of actual trends. Then we have the current plan
23 year projected. And then we have projected for Plan Year 26.
24 And, generally, the trends are in the industry and then in
CAPITOL REPORTERS (775) 882-5322

1 particular pharmacy trend has been above industry. And I
2 want to note here that this pharmacy trend is just for
3 claims. It doesn't consider the effective rebates, which
4 we'll show the effective rebates on cost and trend here in a
5 few slides. But, generally, we're showing this comparison
6 without considering rebates because that's how trends are
7 reported in the industry. And so it's easier to find that
8 industry benchmark with that comparison.

9 I will say that even though pharmacy trends have
10 been very high the last couple of years, they are cooling off
11 a little bit, which is I think very -- which is favorable and
12 a good thing for PEBP, for the state, for PEBP, and the
13 members.

14 For medical trend, we see -- we've seen a fairly
15 steady climb over the last couple of years. This shows from
16 June 2021 through June 2025, the last couple of months
17 projected. And that's the dotted part of the line out to the
18 right. So the way to read this, so it's on a per employee
19 per month basis, and average costs having risen from \$600 on
20 the far left up to \$726 per employee per month. And this is
21 just medical. And with the trend being generally between
22 five and a half and six and a half percent annually.

23 And then at the table on the bottom we have
24 comparison between the pricing trend that is used in the
CAPITOL REPORTERS (775) 882-5322

1 budget projections, the set rates, which is correlated to the
2 governor's budget trend and then a comparison with actual.

3 And, generally, the governor's budget trend has been
4 significantly lower than the actual trend, which has created
5 some pressure on the asset level and the reserves of PEBP.

6 I would note that in 2026, at least the
7 preliminary budget for the state has a higher than, in my
8 opinion, more realistic trend assumption for medical at five
9 percent, which is more in line with what we would expect and
10 what we're assuming for the next plan year.

11 Trends have been pretty persistent for a variety
12 of reasons. You have upward pressure on provider costs due
13 to an ongoing labor shortage. They're having difficulty in
14 the last couple of years in recruiting staff, retaining
15 staff, cost of supplies, access to supplies has been -- have
16 been a challenge. And then also in Nevada there's one of the
17 lowest provider per capita ratios in the country. So, with
18 fewer providers, that generally results in more difficulty in
19 negotiating with those providers. Again, in a commercial
20 setting. Not considering Medicaid or Medicare where there's
21 a fee schedule that the providers accept or don't accept.
22 Again, there's negotiation between the provider and the
23 network manager in the commercial market. So it takes both
24 parties to agree to the terms.

CAPITOL REPORTERS (775) 882-5322

1 And, as these provider contracts, network
2 contracts that generally have a two or three-year term, as
3 they've been coming up for renewal the last couple of years,
4 there's been upward pressure from the providers, making it
5 more challenging to manage those increases.

6 And then also within PEBP we're seeing an
7 increase in virtually all condition and disease categories,
8 where in the consent agenda there is a wealth of material
9 showing disease prevalence, cost, but some of the main
10 drivers are increases. And I'm going to say MSK because I
11 have a hard time saying musculoskeletal. And then also
12 diabetes, cancer are some of the leading drivers in cost
13 increases. But then also recently behavioral health has
14 become a more highly accessed, highly utilized, highly in
15 demand need in the membership. And then there's significant
16 increases in people that have high blood pressure and high
17 cholesterol. And that's maybe not driving cost now. But,
18 for a lot of people, it's an indicator of their increasing
19 health risk.

20 So, pharmacy, and it is eye-popping to see a 20.8
21 percent trend there in the middle. We don't often see that.
22 Although we are seeing several plans, several state plans,
23 with strong double digit, in the teens, annual trend for
24 claims. We have two lines on this particular exhibit. One,
CAPITOL REPORTERS (775) 882-5322

1 the blue line at the top, is for claims. And then the orange
2 line below that is once rebates have been netted out. So, in
3 the far right, on a per employee per month basis, we have
4 claims, plan paid claims of \$308, and once rebates are netted
5 out, it's \$198. So that's a significant difference, 36
6 percent, and about \$110, I believe, is the difference. So
7 it's a significant portion of the claims that are offset by
8 pharmacy rebates.

9 And in the table down below, we add a column to
10 show the effect on trend. So, in 2023, I'm going to call
11 that out, there's a pretty significant difference between the
12 claims cost trend of 14.3 percent and the net trend of .5
13 percent. And that's due to having significantly renegotiated
14 the rebate terms for the 2023 plan year. And, so, as the
15 rebates increase significantly, that offsets almost all of
16 the trend increase for that year. But then since then we've
17 had essentially trend increases in the rebate guarantees.
18 So, a little bit stronger than trends, probably about two
19 percent. You see about a two percent difference here of 20.8
20 versus 18.8 and 15.5 versus about 14. So one and a half to
21 two percent.

22 Another highlight here, another callout, is the
23 governor's budget trend compared to the pricing trend that's
24 been assumed to set rates. Historically, it's been very low,
CAPITOL REPORTERS (775) 882-5322

1 3.67, four percent, excuse me. And that has been
2 significantly lower than the actual trend. And so for 2026,
3 the preliminary governor's budget uses I would say a more
4 realistic trend assumption of 15 percent, which is more in
5 line with the experience that we're seeing with the plan and
6 what we're seeing when it comes to setting budget rates.

7 Dental. You see there's significant increase
8 from 23 to 24, but that is due to the where there is a change
9 in the annual benefit limit and so that has not been
10 normalized or netted out here. This is just strictly the
11 plan paid cost of that increase led to -- that increase in
12 benefit or that benefit enhancement led to about a 12 percent
13 increase in cost. I will note though that the dollar amounts
14 here are pretty small, so that 12 percent increase is six
15 dollars on a per employee per month basis. And, once you
16 blend dental in with medical and drug, you're looking at
17 dental being about five percent of the total cost.

18 And, trends generally for dental benefits are
19 more modest, more in the two to three percent range, which
20 except for that one year is generally what we've been seeing
21 with PEBP and what we expect to see going forward.

22 Okay. Now, the -- Every year Segal conducts a
23 health plan cost trend survey and it's a survey -- I think
24 this is an important thing to note here is we survey

CAPITOL REPORTERS (775) 882-5322

1 carriers, administrators, PBM's, HMO's in the industry and
2 they respond with their trend assumptions or expectations for
3 the next two years. And then they also report on what their
4 actual costs were. So every year we compare the actual with
5 what they had told us the prior year they were projecting.
6 And then we have an actual to expect the comparison that we
7 have going forward every year. And then we also have their
8 expectations going forward.

9 And so what the report provides is the industry's
10 expectation. It's a synthesis of all of those organizations'
11 trend assumptions. It's not Segal's trend assumption.
12 Although it does provide guidance for recommendations that we
13 provide clients or what we think is going to happen in the
14 industry. That's maybe a fine point but an important one.

15 And we get responses from pretty much everybody,
16 over 70 national and regional insurance carriers,
17 administrators, and PBM's. And, historically, we might have
18 reported that as 200 entities. But that was when we
19 considered all the Blue Crosses to be separate, all the Delta
20 Dentals are separate by state also. And now it's just we
21 consider Blue Cross as one and Delta Dental as one.

22 So the network is about 80 percent of the market.
23 And we look at medical PPO and POS plans, HMO and EPO plans,
24 HSA-qualified, high deductible health plans, we get it
CAPITOL REPORTERS (775) 882-5322

1 separately for medical, dental, drug, vision, and so on.

2 This shows the actual trends in the industry for
3 medical, drug, and dental. The green line at the top that
4 generally has the highest trends is for pharmacy. And the
5 bluish-purple line in the middle, or that's generally in the
6 middle, that's medical. And then the orange at bottom is
7 dental. And we don't know yet from the industry what
8 their -- And this is shown on a fiscal year or a plan year
9 basis. The survey actually works on a calendar year basis,
10 but we converted that calendar year basis to match PEBP's
11 timing. So, for Plan Year 24 and 25, we're actually showing
12 what the industry is projecting here rather than the actuals,
13 because that's not known yet.

14 And I also want to note that these are the
15 increases. So when you see a line go down, like in the
16 middle here for the purple, the 6.6 percent for the medical
17 going down to 2.4 percent, that just means that cost
18 increased at a lower rate. It's not an actual decline in
19 cost. The only point here that's an actual reduction in cost
20 is in Plan Year 2020 for dental that where cost reduced by
21 half a percentage. All of these others are increases.

22 But I think this is an illustration of, one, the
23 effect of the pandemic in 2020, that hit dental and medical
24 trends pretty significantly. There is a significant

CAPITOL REPORTERS (775) 882-5322

1 reduction. And then there was a rebound after the fact. And
2 then since then we're seeing pharmacy costs just continue to
3 increase in the industry, even though about six or seven
4 years ago they were about five percent. They were
5 significantly lower. Now we're seeing them six, seven points
6 higher in trend every year.

7 This graph shows the dotted line that's pretty
8 flat across the middle for medical -- this is for medical is
9 the industry expectations. And then the solid blue dark blue
10 line is the actual. So, for Plan Year 21, the industry
11 expected a 7.3 percent trend for medical and 2.3 percent is
12 what actually happened. And, then, the next year, 7.5 is
13 what was expected, is what they were assuming. And then the
14 actual was six percent. And then the light blue line is
15 PEBP. And you can see for a couple of years the PEBP trend
16 was fairly volatile. Now, Plan Year 21 is coming out -- I
17 don't know if it's coming out of the pandemic, but it's the
18 years immediately after the very first year of the pandemic.
19 And, so, there's some volatility here, I think. 21 with a
20 14.9 percent is a bounceback. And then because you have a
21 very high year as the baseline for the following year, things
22 are fairly flat. And then you have trend becoming more
23 normal over the last couple of years; 6.5, 5.5, and now we're
24 projecting 6.8 for the current plan year, 25.

CAPITOL REPORTERS (775) 882-5322

1 So, generally, at least for right now, we're
2 seeing -- we're expecting trends to be a little bit low than
3 what the industry is expecting.

4 And, for pharmacy, we have -- we have the dotted
5 line is the expected, the dark line is the actual. And the
6 industry assumptions have been lagging what's actually been
7 happening. So the industry has been a little more optimistic
8 than what has actually been happening. So, like, right now
9 for Plan Year 23, the most recent year that we have
10 experience, the industry was expecting 9.1 percent. And the
11 actual industry increases in pharmacy claims cost was 12
12 percent. And that light blue line is PEBP. And, for the
13 most recent couple of years, PEBP is exceeding industry
14 trends on a claims basis. But then the purple line that's
15 just below that, that's what we're expecting or what has
16 happened and what we're expecting once rebates are
17 considered. So you can see the beneficial impact of rebates
18 on not just cost but also on trends. Trends are a little bit
19 lower once we consider rebates.

20 And, for dental, PEBP's trend has been pretty
21 volatile mostly because of that benefit change and also
22 coming out of the pandemic. And then also for dental, the
23 industry's assumptions have been lagging actual trend
24 increases over the last couple of years.

CAPITOL REPORTERS (775) 882-5322

1 Also, imagine some of the reasons for increases.
2 Just to revisit a few of those. I think nationally we have
3 new treatments, therapies, and technologies that are
4 generally high cost that are treating -- that enable us to
5 treat conditions that were previously untreatable. And, so,
6 while that is a great thing on a personal level and for the
7 patients and for us as a society, it does come with cost.

8 We have another state client that recently had a
9 13 million dollar claimant. And so we're starting to see
10 more of these high cost claimants that are in -- they're
11 infrequent, but they're occurring more often. But they're
12 challenging the budget. You're not going to predict a
13 13-million-dollar claim. That's just not something that
14 we're expecting at this point.

15 Also, provider price increases. I mentioned that
16 providers have financial challenges that are -- that are
17 affecting how they're approaching negotiations with
18 commercial payers in a way that's different than it was five,
19 six years ago.

20 And then also I mentioned earlier Medicare and
21 Medicaid. Medicare and Medicaid have a fixed fee schedule
22 that providers either accept it or they don't. And, those
23 fee schedules, the increases in those fee schedules, have
24 been lower than in the commercial market. And also there's

CAPITOL REPORTERS (775) 882-5322

1 an increasing Medicare and Medicaid population. So, think
2 about it from a provider's standpoint. That provider may be
3 seeing Medicaid patients, may be seeing Medicare patients,
4 and also seeing commercial patients or patients that are
5 covered through commercial insurance.

6 And, as the Medicare and Medicaid, their income
7 associated with providing care for Medicare and Medicaid is
8 not increasing at the rate that their costs are increasing
9 and also maybe they're seeing more patients on that fixed fee
10 schedule, it's creating more pressure on the commercial -- on
11 the commercial component of their business as a provider.
12 And, so, we're feeling that with really all commercial plans,
13 including PEBP.

14 Just an overview here of the pricing methodology
15 and how we go about it. So we look at historic claims and
16 enrollments. We take 24 months of PEBP claims and
17 enrollment. We develop per capita cost for medical,
18 pharmacy, and dental. And then we make -- We also look at
19 the effect of programs, so the effective rebates, for
20 example. Also, if there's any capitation fees that are
21 included with the claims and the effect of any savings
22 programs, so the SaveOnSP pharmacy coupon management program,
23 that comes with a benefit and a savings. So we consider all
24 of that. And then we trend it forward to, in this case, Plan
CAPITOL REPORTERS (775) 882-5322

1 Year 26, using the assumptions mentioned earlier, five
2 percent for medical and so on. If there are any plan
3 changes, we consider those and make an adjustment for those
4 and really make an adjustment for everything that would be
5 different from the experience period to the projection
6 period. It might be differences in demographics. We might
7 look at if we have an ongoing migration from the CDH plan and
8 the EPO and the HMO to the low deductible PPO, so we're
9 accounting for all of that stuff.

10 And then we add on administrative fees. There's
11 ASO fees for PEBP's vendors. There's internal operation and
12 administrative costs. And we consider all of that stuff in
13 developing the total budgets rates.

14 And then we look at -- And then we allocate those
15 costs across all plans, all the coverage tiers. And then
16 when it comes time to determine the employee and retiree
17 contributions, we consider funding, so the AGIS and the REGI,
18 the funding for -- that comes from the state for PEBP. And
19 we're seeing, and we've just reviewed here for the last
20 little while, significant and ongoing increases in claims
21 costs. And the last couple of years, that has contributed to
22 PEBP reserves being spent down. And so the funding and the
23 revenue that's going to come in from the state is important
24 in determining what the net differential is for the employees

CAPITOL REPORTERS (775) 882-5322

1 and the retirees today. So, currently, for Plan Year 25, the
2 AGIS, which is the active employee funding rate from the
3 state, is \$780 per employee. And, in the preliminary
4 initial, not final, governor's budget, that is increasing to
5 10.2. So we're seeing significant increases in expenses, but
6 then for this year we're seeing, at least initially, a
7 significant increase in the AGIS for the first year of the
8 biennium. However, for the second year of the biennium, that
9 may go down to 982, and the effect that that reduction would
10 have on employee premiums could be significant.

11 So that's a \$40 difference and with the -- and
12 there's essentially a dollar for dollar effect on employee
13 premiums and the -- Think about it as a percentage. There's
14 significant leveraging. So the CDHP single premium is about
15 \$55. So, a \$40, dollar for dollar, impact on that rate on
16 that premium while costs continue to increase would be
17 significant.

18 And so there's some -- I'm about to hand it over
19 here to Tina. Hopefully I'm transitioning okay here. So
20 there's a premium consideration to hold some of that back for
21 the second biennium so that the increase in the second year
22 is more manageable. And so that's the thinking behind the
23 different rate scenarios that are included in the board
24 packet.

CAPITOL REPORTERS (775) 882-5322

1 The next couple of slides just have details on
2 how we do it. I'm not going to read through that. If you
3 have questions on it. But I think that's for reference and
4 additional information.

5 And, with that, I'm done, pending any questions.

6 CHAIRPERSON GRIMMER: Yes, Ms. Kelley.

7 MEMBER KELLEY: Thank you, Chair Grimmer.

8 Thank you for that presentation, Mr. Ward. Very
9 thorough. I just have a couple of questions. You know, I
10 know RX, obviously, isn't the largest part of our coverage
11 plan, if you will. But, given the trend, it's going to get
12 there eventually, right. It feels like that.

13 And I'm doing some reading. Yay for Michelle.
14 And I was reading that, like, especially in this specialty
15 job area, which is, of course, what's driving our trend that
16 one of the big changes from -- that's driving the trend is
17 how pharmaceutical companies are pricing these drugs, where
18 they used to kind of work out how much it cost them to make
19 per their research and their product development and end up
20 building a profit margin and then set a price. It's my
21 understanding that now they are setting the price based on
22 lifetime therapeutic value, which many of these drugs are one
23 and done, you know. And, so, instead of just pricing them at
24 five million dollars, they're kind of doing this

CAPITOL REPORTERS (775) 882-5322

1 pseudo-calculation of, well, if you had to take a drug every
2 month for your entire life, it would cost you this much. And
3 so that's where we're going to price this drug.

4 And what I was reading said that they really --
5 no one had successfully pushed back on that model of pricing,
6 except for perhaps Medicaid, but they won't release the data
7 because it's kind of confidential. Can you talk a little bit
8 about that and Segal's experience in kind of that specialty
9 area and the pricing?

10 MR. WARD: It's a very frustrating situation. So
11 the increases in drug cost primarily with specialty but also
12 with non-specialty, there's some very high cost non-specialty
13 medications as well. But specialty is generally half of the
14 pharmacy cost, trending up towards 60 percent or more. And
15 it's a very small portion of the actual scripts. So these
16 are very high dollar medications and the drug manufacturers
17 are setting prices, in my opinion, at what they can get away
18 with. If you have a -- If they make a drug -- If there's a
19 drug that exists, it's the only drug that exists to treat a
20 specific condition and it has a significant effect on quality
21 of life or is perhaps even life-saving, then they have
22 correctly read or assumed that they have the leverage and
23 they are pushing that leverage. And it has resulted in new
24 very high cost medications and recurrent medications to have

CAPITOL REPORTERS (775) 882-5322

1 significantly high trends.

2 And you mention that it becoming a significant
3 portion of the cost. Generally right now we're seeing
4 pharmacy costs between 20 and 30 percent of the total medical
5 and pharmacy spent. I remember not that long ago -- Maybe
6 I'm aging myself here -- it was between five and ten percent.
7 And so that's just the force of significantly higher trends
8 over a ten, 15-year period.

9 And one other comment that I have is that there's
10 a lot of medical drugs spent that is included in the medical
11 numbers. So, the inpatient infusion, cancer treatment
12 that -- So treatments and medications that are provided in a
13 medical setting or in a provider's office setting. When you
14 take that -- those costs with pharmacy costs, which I might
15 just further refine as being outpatient pharmacies. If you
16 take the inpatient pharmacy, the medical pharmacy, and the
17 outpatient pharmacy and put it together, for a lot of our
18 clients, that is the largest main category of spent. It's
19 larger than inpatient facility. It's larger than outpatient
20 facility. It's larger than professional. And it used to
21 be -- And, that is hidden a little bit, because it's split
22 between the two categories. And so it's very concerning.
23 I'm not sure if I'm answering your question or just agreeing
24 with you, but it is very concerning.

CAPITOL REPORTERS (775) 882-5322

1 MEMBER KELLEY: Just a quick follow-up because I
2 know Ms. Rich has got her hand up. I just -- Since we did
3 strategic planning, I just can't get my head around the
4 pharmacy. And I just, you know, you wonder about these
5 pharmaceutical companies. They're single-handedly going to
6 destroy the health insurance industry. Because, at some
7 point, even as a group, we just aren't going to be able to
8 afford to offset the pricing -- the prices that they're
9 charging. I mean, it feels like we're already getting close
10 to it. Our employees are -- The majority of employees who
11 don't actually use very much pharmacy are drowning under the
12 cost of, as you said, kind of these infrequent but super
13 expensive drugs. But, as a whole, we're covering them.

14 So I appreciate your response. But I just wonder
15 as an industry how can employers in health insurance and
16 consultants, what can we do to start -- I don't know. What
17 can we do? Because it feels like, as you said, they're
18 charging whatever they feel like because -- And then if an
19 insurance policy doesn't cover it, what happens? Because
20 that's how it's made, you know. It's the insurer and the
21 employer who is failing as opposed to passing a drug at 15
22 million dollars for one shot. Anyway, thank you.

23 CHAIRPERSON GRIMMER: Thank you.

24 Ms. Rich.

 CAPITOL REPORTERS (775) 882-5322

1 MEMBER RICH: Thank you. Laura Rich for the
2 record.

3 Yeah, Ms. Kelley, you asked the bazillion dollar
4 question, so I appreciate that.

5 My question, Richard, is specifically on the
6 pharmacy trend, your presentation points out that PEBP is
7 well above industry standard. Can you explain what -- why
8 that is? Do we just have -- Is utilization up quite a bit?
9 Is it that, you know, PEBP has some, you know, handful of
10 high cost claimants that are, you know, those anomalies, you
11 know, that they have a diagnosis that requires really, really
12 expensive drugs, whether it's a one-shot drug or a lifetime
13 therapeutic drug? Can you explain why -- what is putting us
14 above the industry standard?

15 MR. WARD: It's primarily due to the overall
16 increase in -- I guess increase in health risk. So I mention
17 this mostly primarily in conjunction with the medical. But
18 the increase in people with diabetes, the increase in cancer
19 incidents, as well as the cost associated with those
20 treatments. The -- Also, the increase in MSK that comes
21 with -- that comes with or results in people having more
22 medications for anti-inflammatories, so for Humira and such.
23 It's really just across the board. It's not like every
24 year -- So hemoglobins -- or hemophiliacs, excuse me --
 CAPITOL REPORTERS (775) 882-5322

1 Hemophiliacs, care for those patients are extremely high.
2 They're extremely expensive. It's not like each year there's
3 a new instance of a hemophiliac that is being a high cost
4 claimant that on its own is driving cost. It's really kind
5 of across the board.

6 And so I think the PEBP memberships' overall
7 health risk is I think is a primary driver. We can certainly
8 look, as we review utilization and specifics, we can point to
9 a couple of -- a couple of indicators, specifics, but overall
10 it's due to the ongoing increase in health risk.

11 MEMBER RICH: Thank you. Just one quick
12 follow-up. I don't know if we're at this point or not.
13 Laura Rich for the record. I don't know if we're at this
14 point or not where we're talking about rates. But I
15 appreciated your explanation on the AGIS and how you are
16 adjusting those, in that scenario you're adjusting for the
17 lower -- the lower AGIS in year two. I think that's
18 important because in year two there's no way for PEBP to get
19 additional money from the legislature and so you potentially
20 put employees at risk in that second year by having to raise
21 premiums very significantly. So I think that it's, you know,
22 it's important to adjust for that as you explained. So I
23 just wanted to put that on the record.

24 CHAIRPERSON GRIMMER: Thank you for that.
CAPITOL REPORTERS (775) 882-5322

1 Ms. Kelley.

2 MS. BITTLESTON: You're on mute.

3 MEMBER KELLEY: I've got a bit of a -- So,
4 firstly, I wonder -- I'm not sure who this question is for.
5 But, you know, when -- decades ago when I worked in private
6 practice, we had stop-loss insurance and, you know, it was
7 more to protect us from -- At that time the cost drivers, of
8 course, were preemie twins who ended up having to stay in a
9 hospital for months. It seem like now we're on the hook for
10 a pharmacy.

11 So I wonder if stop-loss is something that PEBP
12 needs to consider and even if stop-loss would help mitigate
13 some of those expensive pharmacy costs. So that's my first
14 question, if you will.

15 And then my second question is very controversial
16 and it really is a question. I just want to put it out
17 there, it is a question. At what point -- You know, is it
18 worth doing an analysis on separating pharmacy from medical?
19 I know it doesn't -- You know, anyway, I'm just going to
20 leave it there. At what point do we have to actually
21 consider that pharmacy is such a big bucket item and people
22 have so many different needs when it comes to that pharmacy
23 that we actually do have to price it and people select the
24 pharmacy program they need. As I said, controversial, but I
CAPITOL REPORTERS (775) 882-5322

1 just wanted to put it out there.

2 MR. WARD: I can comment on both of those if
3 that's okay. Richard Ward for the record. For stop-loss,
4 generally speaking, over the long term for a plan like PEBP,
5 it is far better to self-insure that risk. And the reason
6 for that is that the best time to have stop-loss is in the
7 one year that you have a spike in claims and you get a
8 reimbursement via coverage for that unexpected incidents and
9 then you terminate the policy. Because, if you don't do
10 that, then it's not whether it's your current carrier or
11 another carrier, you're going to pay that back with
12 successfully -- successively higher premiums. And loss
13 ratios for stop-loss policies are 50, 60, 70 percent. So,
14 because the experience is very volatile, you're just looking
15 at the catastrophic tail end of the experience. So it could
16 be really volatile if you're looking at an individual
17 deductible at a million dollars. The number of million
18 dollar claimants that you're going to have in a given year,
19 it could be two one year, it could be five the next year.
20 And that variation from two to five in isolation is really
21 significant.

22 So stop-loss policies are developed with a very
23 fat margin and retention for that purpose. And there is --
24 And so it's just better over time to reserve appropriately.
CAPITOL REPORTERS (775) 882-5322

1 And PEBP generally has reserved appropriately to absorb those
2 occasional spikes. But, with an ongoing steady increase,
3 that's more of a funding perspective -- more of a funding
4 consideration, in my opinion.

5 And, then, for separating medical and drug, we do
6 have a couple of clients that have considered that and that
7 do it, but it results in a little more exposure to selection
8 from the membership or anti-selection, depending on what
9 perspective you're viewing this.

10 So, members generally choose the plan that suits
11 them the best, which is often, being so it's in their best
12 interest and then that is generally not in the best interest
13 of the plan. And so when you -- if we add that kind of
14 choice, someone that has high drug costs may choose a lower
15 benefit medical plan with a richer pharmacy plan, which is
16 great for them, but it might create financial challenges for
17 PEBP as the plan.

18 But that's a policy consideration for PEBP to
19 consider. There's certainly pros and cons to that approach.

20 CHAIRPERSON GRIMMER: Okay. Thank you for that.
21 Are there any other questions?

22 Okay. Go ahead.

23 MS. GLOVER: I'll go ahead with the rate tables.

24 So Richard explained why we had the two scenarios. So,
CAPITOL REPORTERS (775) 882-5322

1 scenario one may work if we know we can get additional
2 funding in the second year, which, you know, Member Rich and
3 Mr. Ward explained isn't an option for PEBP typically. Right
4 now the budget is set where the second year is at a lower
5 AGIS rate. And that could cause some major spikes if we see
6 increases in our plans like we have over the last couple of
7 years.

8 So, for myself, I did some back-of-the-napkin
9 math. What -- The way we funded the plan for 2025, we use 91
10 percent for a single person on the CDHP. That's where we got
11 the \$651.32 for the employer contribution portion and then
12 carried that to the other plans. If we use that same
13 percentage and just continued the way we have been, we would
14 have a employer contribution of \$773.72. That means based on
15 the increase base rate, the member on the CDHP that's a
16 single on a plan would pay \$75.50 versus the \$55.26 we're
17 recommending. So that is significantly higher. You're
18 talking a \$20 a month bump, essentially.

19 If you look at your board packet on the last page
20 of the rate tables, it shows you what the rates should have
21 been for 2026. So -- or for 2025. A single person on the
22 CDHP would have paid \$63.56, but we opted to mitigate that
23 increase using catastrophic reserves. So, we artificially
24 lowered the rate, when our experience shows we needed that
CAPITOL REPORTERS (775) 882-5322

1 rate to be 63. Now, we brought in additional funding through
2 RX rebates and additional employer contribution, which did
3 help us.

4 But, right now, we will be going to IFC on April
5 3rd, asking for 33 million dollars to bump up our claims
6 category, because that is the shortfall we're projecting for
7 now to the end of the year.

8 Last year, so for Plan Year 2024, that was ten
9 million. And, in Plan Year 2023, that was also ten million.
10 We are not going down. We are going up. It's costing us
11 more to run this plan.

12 The other thing we have to take in to
13 consideration is not just the employer contribution that is
14 going to be lower in the second year. We have a lot of bills
15 out there that could require PEBP to cover more benefits,
16 reduce prior authorization, include benefits we don't
17 currently include, change how we apply RX rebates to the
18 plan.

19 If those happen, they will all happen in Plan
20 Year 2027. So, not only will we have a lower AGIS rate, we
21 will also have potentially an increase to our base rate,
22 which means sticker shock for year two will be significant.
23 Unless there's some, I don't know, miracle, for lack of
24 better word that is going to cause our rates to go down, I
CAPITOL REPORTERS (775) 882-5322

1 don't see how we're going to survive that.

2 In addition, we've been tapping in to IBNR and
3 catastrophic reserves to keep the plan afloat. That is our
4 stop-loss insurance. And we are having to build that back
5 up. So the amount we actually need is higher than we're
6 asking for.

7 So, with the discussion of fiduciary
8 responsibilities in making sure the plan stays afloat, my
9 recommendation is that we go with scenario two, which would
10 reduce the amount of AGIS transferred from the 806. It will
11 reduce it down by the \$12.28 that it shows in that table, so
12 that subsidy would be somewhere in the neighborhood of 700
13 and -- I think it's 775 or something.

14 So, to try to hopefully offset, if we get -- if
15 we have a good experience year, that's great. But the cost
16 is already high. So, I am just trying to be conservative in
17 my thought process, and that is why we've gone to scenario
18 two.

19 And, with that, I'll take any additional
20 questions.

21 CHAIRPERSON GRIMMER: Are there any questions?
22 Okay. Seeing none, this is for possible action. Do we have
23 a motion to approve? Oh, go ahead, Michelle.

24 MEMBER KELLEY: Oh, no. I was just going to make
CAPITOL REPORTERS (775) 882-5322

1 a motion to approve the rates as laid out in scenario two,
2 which reserves money for -- to support the rate structure in
3 fiscal year 2027. I just want that to be clear to anyone
4 watching. So, yes, my motion is to approve staff's
5 recommendation, scenario number two.

6 CHAIRPERSON GRIMMER: Thank you.

7 Do we have a second?

8 MEMBER RICH: Laura Rich. I'll second.

9 CHAIRPERSON GRIMMER: Thank you. Any further
10 discussion? Okay. Seeing none, all of those favor signify
11 by saying aye.

12 (All members voted in favor of the motion, except for Member
13 Barnes)

14 CHAIRPERSON GRIMMER: All of those opposed?
15 Okay. Motion passes.

16 Oh, sorry. Jim, did you vote opposed?

17 MEMBER BARNES: Yes, I'm voting against that.

18 CHAIRPERSON GRIMMER: Okay. Okay. Did the court
19 reporter get that?

20 THE COURT REPORTER: Yes, I did. Thank you.

21 CHAIRPERSON GRIMMER: Okay. Motion still passes.

22 We will close Agenda Item Number 6 and go on to
23 Agenda Item Number 7, discussion and possible action on
24 recommended changes and updates to the master plan documents
CAPITOL REPORTERS (775) 882-5322

1 for Plan Year 2026. Leslie Bittleston. For possible action.

2 MS. BITTLESTON: Thank you, Madam Chair. Leslie
3 Bittleston, Quality Control Officer, for the record.

4 In your packet of materials, I believe it is page
5 271, there is a report, item number seven, that I will go
6 over in just a minute. I do want to premise this agenda item
7 with talking about the major challenge of MPD's, and that is
8 keeping the MPD's up to date. There are a lot of changes
9 that happen that affect MPD's such as federal guidance,
10 industry standards, FDA approvals, and legislation within our
11 own state.

12 So all of those things affect MPD's. And we find
13 that we play catch up a lot. So, I mean, our goal is to be
14 as proactive as we can and have MPD's that are as up to date
15 as possible.

16 One of the things that we will be updating after
17 this meeting, of course, is the rates that go along with the
18 services, because we just approved the rates just a minute
19 ago. So keep that in mind as I move through the report
20 provided.

21 And I am going to share my screen maybe, somehow.
22 There we go. Perfect.

23 Okay. So MPD changes. Can everybody see the
24 screen? Perfect. Okay. This report will go over benefit
CAPITOL REPORTERS (775) 882-5322

1 changes and updates for the master plan documents and summary
2 of benefits coverage for Plan Year 26 for the three PEBP
3 plans, the consumer driven health plan, the low deductible
4 plan, and the exclusive provider organization or the EPO
5 plan.

6 I just started this position in July of last
7 year, so I got a late start on these. So a lot of documents
8 have not yet been reviewed and touched and those -- there's a
9 list of those, the dental plan, the health reimbursement
10 arrangement. So all of those documents have not yet been
11 touched. And I will address that in a few more minutes later
12 in the report.

13 For those of you who were or are interested in
14 looking at the three documents that have been changed, the
15 redline versions are available at the following link at the
16 bottom of page one. It is kind of a mess. So just please
17 know that these are working documents.

18 So, throughout the plan year, plan document
19 verbiage and various changes occur. And, to prepare for the
20 changes that are presented today, PEBP staff and vendors
21 reviewed master plan documents and discussed some proposed
22 changes. I would like to thank, personally thank, ESI staff
23 for their assistance in going through the pharmacy portion of
24 the master plan document.

CAPITOL REPORTERS (775) 882-5322

1 So, moving on to the proposed changes, on page
2 three, we have three enhancements. Enhancement number one is
3 an addition, a prescription drug addition of Lofexidine,
4 which is an additional FDA-approved drug to treat substance
5 use disorder. So that is an enhancement. Another
6 enhancement added coverage of FDA-approved drugs used for the
7 prevention of HIV. And enhancement number three is around
8 mammograms.

9 There's been some industry standard changes
10 around mammograms recently, so this change kind of brings
11 that more in to line with industry standards. So mammograms
12 for women begin at age 40. However, there is recommendation
13 that women at high risk, and the industry standard states 20
14 percent chance or greater risk of developing breast cancer
15 can get mammograms or other screenings at age 30 and women
16 who have identified genetic mutations may start cancer
17 screenings at age 20. Industry standard also recommends that
18 men at high risk or with genetic mutations present may
19 receive breast cancer screenings, including mammograms or
20 other diagnostic testing. So that is an enhancement which
21 lowers the age and also outlines the fact that women at high
22 risk can receive mammograms much younger and men are -- can
23 receive mammograms as well or other screenings.

24 Going on to the next section, this is where
 CAPITOL REPORTERS (775) 882-5322

1 there's the premise of what I talked about, the challenge of
2 keeping MPD's up to date.

3 The next section is clarification. These are
4 things that the plan has already been covering, but the
5 master plan documents didn't keep up with the fact that the
6 plan was covering these things. And most of these were
7 identified at the biennial compliance review that was
8 conducted by CTI and presented at a previous board meeting.

9 So, clarification, we removed the age limit for
10 vision services. There is no limit for children under the
11 age of 19.

12 Under the prescription drug benefits, we
13 clarified routine vaccinations, so there is a list of routine
14 vaccinations that are covered at a hundred percent.

15 Added a co-pay structure for telehealth and
16 removed co-insurance requirement. Clarified that telehealth
17 is not provided out of network. It is only provided in
18 network.

19 Added number five. This clarification is around
20 the individuals that are required to cover children as a part
21 of a child support agreement. So this language was added per
22 recommendation in the compliance report.

23 Let's see. Clarified that the plan does cover
24 testing for HIV and Hep C.

CAPITOL REPORTERS (775) 882-5322

1 Clarified that abortion services are covered
2 pursuant to 422.250. Our master plan documents were kind of
3 in conflict. In one stage we would say we don't cover
4 abortion services and then in another area we said we do
5 cover it. So it's really trying to make sure we are
6 clarifying and saying the same thing throughout the document.

7 Number eight, gestational carriers are covered
8 for maternity services. That is clarification.

9 Clarified payment procedures for mental health
10 and substance use providers clarify that vendors must use
11 overpayment standards pursuant to the NRS listed there.

12 Clarified that members may obtain three emergency
13 prescriptions, prescription refills per plan year, and may
14 also receive an emergency refill if in a designated disaster
15 area.

16 Talk about additional services and testing around
17 maternity, women that are pregnant. There is a whole list of
18 testing requirements for pregnant women that include STD's,
19 syphilis, gonorrhea, HIV, Hep C, a lot of those things. So,
20 as I stated, the plan was covering that, we just wanted to
21 outline that in the MPD.

22 Clarified that hormone replacement therapy is
23 covered.

24 Verified that coverage for condoms for
CAPITOL REPORTERS (775) 882-5322

1 individuals, that's both males and females, age 13 and older,
2 is covered. And, for clarification, condoms can be covered
3 either on the pharmacy or the medical side, can be covered by
4 the pharmacy with a prescription or the medical side with a
5 proof of receipt submitted to UMR for reimbursement.

6 And then the FDA-approved drugs for HIV.

7 Now, the next section is clerical. This is --
8 encompasses a lot of the MPD's. So what happened is in
9 looking at the MPD's and the fact that we try to be proactive
10 in keeping up with the changes, the MPD's, unfortunately,
11 became kind of convoluted over time with sentences that
12 weren't completed, information that was out of order,
13 outdated definitions, and just a lot of cleanup, so to speak.
14 So there were seven major clerical areas that were addressed
15 within the MPD's.

16 We updated the travel requirements. We made
17 formatting changes throughout. We removed the PEBP one-time
18 funding for the HRA and HSA that was approved in past board
19 meetings. We moved paragraphs to flow better within
20 sections. We updated the plan year from 7-1 2025 through
21 6-30 2026. We updated definitions with more newer language.
22 We also removed the definition sections and sections within
23 each MPD and included the definitions within the areas that
24 it applies. So, if somebody, you know, doesn't know what

CAPITOL REPORTERS (775) 882-5322

1 something is, it's now right there in the area, rather than
2 having to go to the definition section to look up something
3 that somebody may not know what it means.

4 Lastly, we also looked at and updated and revised
5 all references to NRS and NAC. So those are all of the
6 changes made.

7 With those changes, there is still a lot of work
8 to be done with the MPD's. So, internally, PEBP QC has a
9 plan to update all of the MPD's over the next two years. And
10 this next section talks about that plan and what our plan is
11 going forward.

12 So, to go over this, the plan is to have one
13 master plan document that includes the CDHP, the LD PPO, and
14 the EPO. Those are all the medical plans. This is how
15 things were several years ago and then somehow plans got
16 split up into individual MPD's and that caused problems in
17 itself, as MPD's, you know, got convoluted and sometimes
18 didn't say the same thing. So we are proposing going back to
19 one large document, like I said, down the road in two years
20 having this done.

21 The second area is there is currently an
22 eligibility and enrollment master plan document. This
23 document is more internal and more has processes for internal
24 staff, so the proposal is to remove the enrollment and
CAPITOL REPORTERS (775) 882-5322

1 eligibility master plan document and have an eligibility and
2 enrollment policy. There will no longer be a public-facing
3 document for enrollment and eligibility. However, there will
4 still be information that the public needs to know in other
5 documents, the qualifying life events guide and the benefit
6 guide. Both of those provide all the information that the
7 public needs to know about their eligibility for PEBP plans.

8 The policy -- The document as it stands today is
9 more for eligibility staff internally, which is why we are
10 moving to a policy.

11 The next one is there are two wrap documents, one
12 for actives and one for retirees. We are going to
13 consolidate and have one wrap document.

14 The next proposal is to put the HRA, the health
15 reimbursement arrangement, flexible spending, and the
16 Medicare health reimbursement or arrangement all in to one
17 large master plan document for that specific -- those
18 specific areas.

19 Lastly, the Section 125 master plan document,
20 which is a requirement, that unfortunately didn't really fit
21 in any other documents, so that will remain its own document.

22 Additional changes for this year which will be
23 made prior to open enrollment, we will have the 2025 benefit
24 guide updated to the 2026 benefit guide. It will also

CAPITOL REPORTERS (775) 882-5322

1 include the general plans option details one-page documents,
2 so that will be included in the 2026 benefit guide.

3 The 2025 plan comparison will be the 2026 plan
4 comparison. The qualifying life events document will be
5 reviewed and ensure that it is still accurate. And then the
6 commonly used medical terms will remain.

7 This was a large report. Sorry about that. But,
8 we do have some recommendations, as this is an action item.
9 Staff recommendations to the board is to approve PEBP staff
10 proposed changes as presented to allow staff to continue
11 formatting documents, the document to allow staff to update
12 the table of contents prior to publication because that has
13 not yet been touched, allow PEBP staff final review prior to
14 publication, allow vendors, which would be UMR and ESI final
15 review prior to publication, and allow for technical
16 adjustments as necessary.

17 The technical adjustments includes the fact that
18 we do have to update the rates now that -- Now that we have
19 the rates, we can update those. So that is my report and I
20 can take any questions.

21 CHAIRPERSON GRIMMER: Okay. Thank you for that.
22 Are there any questions? Okay. Go ahead,
23 Ms. Kelley.

24 MEMBER KELLEY: Quick question. Leslie, thank
CAPITOL REPORTERS (775) 882-5322

1 you for all the work you've done, Ms. Bittleston. It looks
2 like it's been a lot of work and time well spent. And your
3 report is very thorough and I appreciate that as well.

4 I just had one question. You know, I know at
5 NSHE we have obviously eight institutions and all of the
6 institutions do open enrollment and assist employees with
7 understanding their benefits enrollment eligibility, all of
8 that kind of stuff. So that enrollment and eligibility guide
9 that you said is internal has most likely been very helpful
10 to those people. And I'm just wondering if you plan to send
11 that out to, you know, all agency reps who support PEBP.
12 Because I do think that, you know, if you utilize those
13 people they're incredibly helpful and getting information
14 right the first time is always helpful as well. So that
15 would be my question.

16 MS. BITTLESTON: Leslie Bittleston for the
17 record. That is an excellent idea that I had not thought
18 about sending that out to agency representatives because they
19 do -- they do play a big role in educating staff and, you
20 know, they're the ones that report all new hires to PEBP so
21 PEBP can get them enrolled and all of that.

22 Another thing I do want to say is even though
23 something may be an internal policy does not mean that it is
24 a secret document. We, you know, are willing to share any
CAPITOL REPORTERS (775) 882-5322

1 document upon request if it is something that is not
2 publically-facing. So, if a member or somebody wants the
3 eligibility and enrollment policy, we will be more than happy
4 to send them a copy.

5 But I agree that it would be a really great idea
6 to send that out to agency representatives when it is
7 completed.

8 CHAIRPERSON GRIMMER: Thank you for that.
9 Go ahead, Ms. Rich.

10 MEMBER RICH: Laura Rich for the record. I just
11 wanted to commend Leslie on the work that she's doing. I
12 think that everything that was proposed, great ideas,
13 especially bringing those MPD's all in to one document. I
14 think that's going to be super helpful for members as well as
15 staff. Every single year that is a lot of work for staff to
16 do and go through and there's, you know, there's so many
17 documents and not enough hands and eyes to go through all of
18 those and time. So consolidating that is a great idea. So I
19 just wanted to commend her on that.

20 CHAIRPERSON GRIMMER: Thank you for that. Are
21 there any other questions or discussion? Okay.

22 Seeing none -- Laura, did you have another item?
23 I'm sorry. Okay. Just making sure. Seeing no others, do we
24 have a motion to approve this item?

CAPITOL REPORTERS (775) 882-5322

1 MEMBER RICH: I'll move to approve the item.

2 Laura Rich for the record.

3 CHAIRPERSON GRIMMER: Thank you.

4 Do we have a second?

5 MEMBER KELLEY: I'll second it.

6 CHAIRPERSON GRIMMER: Thank you. Any further
7 discussion? Seeing none, all of those in favor, signify by
8 saying aye.

9 (The vote was unanimously in favor of the motion)

10 CHAIRPERSON GRIMMER: Any opposed? Okay. Seeing
11 none, motion passes.

12 We will close Agenda Item Number 7 and move on to
13 Agenda Item Number 8, discussion and possible action
14 regarding the permanent appointment or recruitment of the
15 PEBP executive officer. Is there any discussion on this?

16 Go ahead, Celestena.

17 MS. GLOVER: Okay. So this is Celestena Glover
18 for the record. So we put this out there so the board can
19 be -- begin discussing how they want to approach recruitment
20 and appointment of my replacement. I have not given notice
21 yet. I have not met with PERS. I have not set a final date.
22 So those -- that information is still coming. We also need
23 to consider that we're still waiting to hear whether the
24 Nevada Health Authority is going to actually be approved by
CAPITOL REPORTERS (775) 882-5322

1 the legislature and how that will affect PEBP. Will PEBP be
2 included? Will they not?

3 If that happens and PEBP is included, then you're
4 likely recruiting for an administrator level position versus
5 a director level position. And that may change who you get
6 applying for the position. So something to keep in mind.
7 Also may affect how you word the recruitment. And we don't
8 know what that's going to look like until probably May.

9 Part of this process, the board does have the
10 ability to appoint an interim, if that makes more sense,
11 since we do have some moving parts until we get a definite
12 answer one way or the other about the health authority. And,
13 obviously, you can delay making a final decision on that. We
14 can add it as an agenda item on one of our legislative update
15 meetings or we can include it at May. I know there's
16 probably some concern waiting that long since right now my
17 plan is to retire somewhere around mid-summer, but it will be
18 between 15th of July and 15th of August. Like I said, I
19 haven't set a final date. I haven't met with PERS yet. So I
20 just wanted to get that on the record so that the board has a
21 full picture before they start deliberating and to be able to
22 answer whatever questions you may have.

23 CHAIRPERSON GRIMMER: Okay. Are there any
24 questions or discussion?

CAPITOL REPORTERS (775) 882-5322

1 Go ahead, Ms. Kelley.

2 MEMBER KELLEY: Thank you. Michelle Kelley for
3 the record. Firstly, I just want to thank Executive Officer
4 Glover, even though it's a bit premature. I want to thank
5 her for her service and coming back to support PEBP over the
6 last couple of years. I think, you know, health insurance is
7 challenging at the best of times and I think it's certainly
8 been a challenging period. And I really appreciate her
9 service and, you know, respect her knowledge and everything
10 she's done for PEBP immensely.

11 So, saying that, I do think it's my personal
12 belief that we should wait on recruiting for the position on
13 a continuing basis for all of the reasons Executive Officer
14 Glover outlined, specifically kind of the unknowns around
15 where PEBP will end up and what the job might look like.

16 I do think that if PEBP ends up sitting under the
17 Nevada Health Authority then that executive officer or
18 director -- I'm not sure what the position is going to be
19 called. Sorry -- that the leader of that organization
20 probably should be able to hire their own -- their people.
21 And I think that the way the bill is currently laid out that
22 would be the case.

23 So, saying that, I do wonder if we couldn't look
24 internally to see if there is any interest from PEBP senior
CAPITOL REPORTERS (775) 882-5322

1 staff on acting on an interim basis, assuming that interim --
2 an interim person would be allowed to apply for the
3 continuing position when it is recruited for. That -- For me
4 that would perhaps provide some continuity for PEBP staff and
5 also allow some knowledge transfer prior to Executive Officer
6 Glover retiring. Thank you.

7 CHAIRPERSON GRIMMER: Thank you.

8 Go ahead, Ms. Carsten.

9 MEMBER CARSTEN: Thank you. Theresa Carsten for
10 the record. I agree with Michelle and with Celestena. I
11 would prefer to wait. I think Michelle has an interesting
12 idea to make sure that staff feels supported. I think as we
13 get closer to May, Celestena, if you start making your
14 appointments and find that we're moving at a faster pace,
15 then we definitely would probably be interested in an interim
16 person so that everybody is covered.

17 CHAIRPERSON GRIMMER: Thank you for that.

18 Any other discussion?

19 Go ahead, Celestena.

20 MS. GLOVER: So I just wanted to -- This is
21 Celestena Glover. I just wanted to say that as soon as I
22 have an actual date picked out, I will send an e-mail out to
23 the board to let them know what that date is. I'll also be
24 notifying the governor's office of the final date so that all
CAPITOL REPORTERS (775) 882-5322

1 the folks that need to know will know. I am planning on
2 trying to get over to PERS some time in the next couple of
3 weeks to set that date. So, barring no changes, the time
4 frame is going to be mid-summer.

5 CHAIRPERSON GRIMMER: Okay. All right. Thank
6 you for that.

7 Do we have -- Does anyone want to make a motion
8 on this item?

9 MEMBER KELLEY: Michelle Kelley for the record.
10 I don't even know if it's a motion. But I think -- I wonder
11 if we -- if the motion -- Let me formate this. Sorry. My
12 mouth has got to catch up with my brain. My motion would be
13 that we put together a request for interest from qualified
14 PEBP staff to explore any interest in an interim, you know,
15 in holding an interim position, you know, but perhaps it's a
16 recruitment for the interim position, and have that brought
17 back to the next meeting so that we can review it and
18 potentially send it out to staff to see the level of interest
19 in someone internal. That was really choppy. I don't know.

20 CHAIRPERSON GRIMMER: Go ahead, Legal Counsel.

21 MS. KUNNEL: Hi. This is Radhika Kunnel for the
22 record. That motion, one, is very -- sounds complicated.
23 But also, more importantly, I am concerned that it may be
24 deviating from the noticed agenda item. And I'm also

CAPITOL REPORTERS (775) 882-5322

1 concerned that there are other complications with the issues
2 and may be something that we have to first reach out to the
3 employment personnel division. I am not sure if that would
4 comport with the noticed agenda item.

5 CHAIRPERSON GRIMMER: Okay.

6 MEMBER KELLEY: Michelle Kelley for the record.
7 I'll withdraw my motion and perhaps ask that the chair reach
8 out to HRM, I guess, and find out kind of what we can do, the
9 parameters of what we can do or what -- because I think --
10 Yeah, that would be perhaps my request. I don't even know.
11 Just a request that we get more information on how to fill an
12 interim position or a continuing position.

13 CHAIRPERSON GRIMMER: Okay. Celestena.

14 MS. GLOVER: So this is Celestena Glover for the
15 record. So, based on the, just this recent back and forth,
16 then maybe my suggestion would be that pending further
17 information that you table this discussion and that we
18 include it on a future board agenda. That might be the way
19 to go. And that should meet the requirements of what the
20 agenda item says. And then you can make a more definite
21 decision and we can clarify that on that future agenda item
22 so that we're doing things appropriately.

23 CHAIRPERSON GRIMMER: Okay. Thank you for that.

24 Do we have a motion on this item, a different motion?

CAPITOL REPORTERS (775) 882-5322

1 MEMBER KELLEY: So moved.

2 CHAIRPERSON GRIMMER: Okay. Do we have a second
3 to table this item? Let me clarify.

4 MEMBER CARSTEN: For the record Theresa Carsten.
5 I'll second.

6 CHAIRPERSON GRIMMER: Thank you.

7 Okay. Is anyone opposed? Okay. Seeing none,
8 all of those in favor, signify by saying aye.

9 (The vote was unanimously in favor of the motion)

10 CHAIRPERSON GRIMMER: Any opposed? Okay. Seeing
11 none, the motion passes.

12 We will close Agenda Item Number 8 and go to
13 Agenda Item Number 9, discussion and possible action
14 regarding 2025 legislative bills that may impact the Public
15 Employees' Benefits Program, including the following:
16 Assembly bills, senate bills, bill draft requests.

17 Ms. Glover.

18 MS. GLOVER: Thank you. This is Celestena Glover
19 for the record. So the table that was included in the board
20 packet includes the same bills that we had on there at our
21 last legislative update and it includes some additional
22 bills.

23 The ones I probably would like to bring your
24 attention to would be AB 349. That is on, I believe, page
 CAPITOL REPORTERS (775) 882-5322

1 four of the document. I don't know what page of the board
2 packet. AB 349 revises some requirements around hospital and
3 ambulatory surgical facility payments. The way the bill is
4 written right now it infers that PEBP direct contracts, which
5 we do not. We use a network vendor. So this is something we
6 would get -- we would need our network vendor to assist with
7 and to comply with. That is why our fiscal note says cannot
8 be determined. We didn't have the information and we
9 typically don't. We don't know what the various provider
10 contracts say as far as their level of payments.

11 The bill says the lesser of the billed amounts,
12 the 2024 rates, which we're in 2025, so I don't know that,
13 you know, facilities would be willing to go back to 2024
14 rates or 175 percent of Medicare.

15 At this stage, I don't know which hospitals may
16 be getting 175 percent, 200 percent, 250 percent. I don't
17 know who those are. So there was no way for us to calculate
18 whether or not we would actually see a savings. My guess is
19 we likely would. But, what that savings would be, we don't
20 know. Obviously, if it can lower rates for the program,
21 we're all in, because our plan, you know, is, as we've seen
22 during the rate setting agenda item, our plan is increasing
23 in cost over the years.

24 So I had a brief discussion with the plan
CAPITOL REPORTERS (775) 882-5322

1 sponsor, but he had worked with Dr. Murray out of Oregon.
2 And neither of those individuals had talked to PEBP ahead of
3 this. So we weren't exactly sure what they were trying to do
4 and I don't think they a hundred percent understood how we
5 typically contract with our providers.

6 So, that one, we have asked Segal to continue to
7 work on what that might look like, give us an analysis so we
8 can determine is it really a savings to PEBP, and, if it is,
9 how much that savings is. So that is one of the items we are
10 watching to see if it goes anywhere.

11 I did attend the hearing. I did answer some
12 questions, which I don't think helped the bill sponsor in any
13 way, shape, or form. But it essentially was I couldn't tell
14 them if the 36 million he had presented in his bill really
15 was going to materialize through this. So, it's not that I
16 wanted to, you know, oppose his bill, because that was not
17 the case. It was simply a presentation and me answering the
18 question.

19 I will say from my take he didn't have anyone
20 supporting the bill when it came to that. I think we're
21 going to see opposition. Because, if that will lower the
22 rates the hospitals are going to get paid, I can't imagine
23 they're going to support this and, you know, how will it
24 affect their bottom line. So, it is a wait and see, but it

CAPITOL REPORTERS (775) 882-5322

1 is something we're monitoring.

2 The next one that I'm keeping track of -- There's
3 actually two that are very similar, and that's going to be SB
4 209 and SB 316. Both of those bills are related to how we
5 apply the RX rebates to our plan. Right now, the rebates
6 that we get in, we apply it to the plan as a whole and reduce
7 the funding we need from employer and employee contributions.
8 If either one of these bills are passed, that would require a
9 supply to the individual who actually has the prescription,
10 which may benefit the individual from a plan perspective as
11 far as paying for their drug. However, what will happen is
12 because we're losing those revenue streams, that will go in
13 to the expenditure side which then would increase the rates
14 across the board, and that increase will be affected by
15 employer premium -- or employer contribution as well as
16 employee premium.

17 So, ultimately, it could still end up costing
18 those individuals that are trying to help just as much money
19 as they pay now. It's just they're going to pay it through
20 premium versus paying it through their co-pays or
21 co-insurance.

22 So we're not sure where that is going to end up
23 going at this point, but those are two that we're mostly
24 concerned about. If you look at the fiscal note, you'll see
CAPITOL REPORTERS (775) 882-5322

1 we're talking about 21 to 23 million dollars, because the two
2 bills have a couple of different provisions in them. And
3 then that doubles to about 46 million dollars in future
4 biennia, depending on, you know, the drugs that are
5 purchased, how the rebates come in and those kinds of things.

6 So, we'll keep monitoring them, we'll see where
7 it goes, and we will bring updates back to the board as they
8 become available.

9 And, with that, I'll take any questions.

10 CHAIRPERSON GRIMMER: Go ahead, Ms. Rich.

11 MEMBER RICH: Laura Rich for the record. I just
12 have a question on AB 349. So, Tena, you said that we don't
13 know what we pay in that analysis. I'm thinking back, I
14 think it was, like, 2015 or 2016 when I remember PEBP did do
15 an analysis, because Montana did something like this where
16 they did their statewide employee plan basically capped
17 rates. And so PEBP was doing an analysis to see if that
18 would be beneficial. And, it was determined that it was in
19 some areas, it wasn't in other areas, and overall it would
20 not be beneficial to the plan. And so I don't think that
21 that ever really got any traction.

22 But I believe, you know, while PEBP doesn't have
23 access to those claims, Segal and UMR do. And so they would
24 be able to pull claims data and bump it against that 175

CAPITOL REPORTERS (775) 882-5322

1 percent. I can't remember what the Medicare number was in
2 that bill. But they would be able to bump it up against that
3 and do the analysis and figure out what exactly, you know, if
4 there would be a savings or if there would not be a savings.
5 Is that something that's being done or can that not be done
6 because of the information that's available in the bill? I'm
7 just kind of confused on that one.

8 MS. GLOVER: So this is Celestena Glover for the
9 record. That is something that we've asked Segal to work on
10 at the time that we needed to submit the fiscal note.
11 Because, you know, the turnaround time is pretty short. We
12 couldn't get the analysis done in time.

13 I am aware that Montana bill from back then and
14 the analysis. We can see if we still have that data on file.
15 We may not at this point in time. And I know other states
16 have done various things to kind of combat that cost. You
17 know, I believe Oklahoma has their own network, but they have
18 the staffing to monitor that, too. So we'll pull whatever
19 data we have and we'll continue to work with Segal and UMR to
20 get that information. We'll be able to provide it in
21 aggregate to the board.

22 Obviously we're not going to talk about what
23 hospital gets what amount, but we'll bring back whatever data
24 we have available at that time.

CAPITOL REPORTERS (775) 882-5322

1 MEMBER RICH: And, just one follow-up, Chair, if
2 I could. Laura Rich for the record.

3 CHAIRPERSON GRIMMER: Yes.

4 MEMBER RICH: On the RX bill, I just want to say,
5 I appreciate your explanation and I do agree with it. I
6 mean, I think that the way that rebates are handled today,
7 it's more fair, right. The cost gets spread out between
8 everybody, but the rebates also do as well. It's not --
9 It's, you know, not fair if costs are spread out evenly
10 within, you know, the entire population but then the rebates
11 are specifically directed towards one individual. So one
12 individual gets to benefit from that versus everybody. And I
13 think that the way that we do it today is just more fair to
14 all members versus, you know, directing it to benefit one
15 member in particular.

16 MS. GLOVER: Thank you for that. This is
17 Celestena Glover. I agree. I think, you know, trying to
18 make this plan from a cost structure be as, you know, get the
19 funding in that we need so that we can cover the cost of
20 those benefits, but trying to mitigate the increases to our
21 members to the best of our ability is the way we need to do
22 this and that is what we're trying to do.

23 I have not talked to the bill sponsors on either
24 one of these bills. So that is something that we can

CAPITOL REPORTERS (775) 882-5322

1 potentially bring to them to try to figure out what it is
2 they're trying to do.

3 During my budget presentation, I did explain how
4 PEBP utilizes their rebates, so I'm not sure that that was
5 considered at the time.

6 CHAIRPERSON GRIMMER: Thank you for that.

7 Any further questions or discussion? Okay.
8 Seeing none, we do have this listed as for possible action,
9 but I don't know if there as a motion on it or not.

10 MS. GLOVER: So this is Celestena Glover for the
11 record. I think the motion, if one is needed, is if the
12 board would like me to take any particular action on any of
13 these bills.

14 CHAIRPERSON GRIMMER: Okay.

15 MS. GLOVER: Like I said in a previous update
16 meeting, you know, typically we will testify in the neutral
17 stance, regardless if you want me to go to those hearings
18 when they come up, if they come up, then I can do that.
19 Otherwise, I can sit back quietly and just wait and see what
20 happens. At the board's pleasure.

21 CHAIRPERSON GRIMMER: Okay. Thank you.

22 Okay. Any direction for Ms. Glover or we will
23 close the item?

24 Okay. Seeing none, we will close Agenda Item
CAPITOL REPORTERS (775) 882-5322

1 Number 9 and move on to Agenda Item Number 10, public
2 comment. Public comment will be taken during this agenda
3 item. Comments are limited to three minutes per person.

4 Staff, can you please put the slide up.

5 MR. HOPKINS: Yes, Madam Chair. We have no one
6 in the lobby, but I will go ahead and make my announcement.

7 CHAIRPERSON GRIMMER: Okay. Thank you.

8 MR. HOPKINS: Thank you. Joining the Zoom
9 meeting as an attendee is for making public comment only. If
10 you do not wish to make a public comment, please leave the
11 Zoom meeting now, so you're not accidentally called upon.
12 Please feel free to watch it via the YouTube live stream on
13 the PEBP YouTube channel. The link for the live stream is
14 located on the agenda. For those who have joined for public
15 comment, your name or the last four digits of your phone
16 number will be announced and you will be advised you have
17 been unmuted. Please fully state and spell your name for the
18 record and then proceed with your comments.

19 I'll give another 30 seconds to a minute, Madam
20 Chair. There's still no one in the lobby.

21 Madam Chair, we have no one in the lobby, so that
22 concludes public comment.

23 CHAIRPERSON GRIMMER: Thank you. So thank you.

24 Okay. Thank you. We will close Agenda Item
CAPITOL REPORTERS (775) 882-5322

1 Number 10 and we will adjourn. Thank you for everyone's time
2 today.

3 (Hearing concluded at 10:58 a.m.)
