CONCLUSION

The information in this report provides plan experience for the Consumer Driven Health Plan for Plan Year 2018. The Consumer Driven Health Plan is seeing an overall increase in total plan paid costs however, this is attributed primarily to an increase in plan enrollment. For HMO utilization and cost data please see the reports provided in Appendix B and C.

PEBP staff and its partners continue to monitor data, research options and implement measures to provide cost savings to the plan while also providing the care our participants require.

Nevada Public Employees' Benefits Program

July 2017 – June 2018

Reimagine | Rediscover Benefits

Overview

- Total Medical Spend for PY18 was \$125,066,281 of which 73.4% was spent in the State Active population.
 When compared to PY17, there was an increase of 2.1% in plan spending overall primarily due to the increased headcount of 3.2%.
 - When compared to PY16, PY18 reflected an overall increase of 3.1% in plan spend, with State Actives having an increase of 9.2%. This again is relative to the increase in headcount of 3.6% for that group of members.
- On a PEPY basis, the plan remained flat when compared to PY17. The largest group, State Actives, reflects an increase of 3.0%.
 - When compared to PY16, PY18 reflected a decrease in PEPY of 3.4%, with State Actives remaining flat.
- 85.7% of the Average Membership had paid Medical claims less than \$2,500, with 17.2% of those having no claims paid at all during the reporting period.
- There were 164 High Cost Claimants (HCC's) over \$100K, that account for 27.7% of the total spend. HCC's accounted for 28.8% of total spend during PY17, with 178 members hitting the \$100K threshold. The largest claimant was a newborn baby with total paid claims in the amount of \$1,480,651.
- IP Paid per Admit for the whole plan was \$17,550, which is a slight decrease of 1.8% over PY17 Paid per Admit of \$17,869.
- ER Paid per Visit is \$1,919, which is a slight decrease of .6% from PY17 ER Paid per Visit of \$1,931.
- 96.4% of all Medical spend dollars were to In Network providers. The average In Network discount is 64.3%, which is a 2.1% increase over the PY17 average of 63.0%.

The premium amounts reflected in this report are total billed premium which include taxes and fees (state premium tax along with ACA taxes and fees). Therefore, the benefit cost ratio (BCR) noted above does not reflect your medical loss ratio. The premium would have to be adjusted to remove pass through dollars before dividing into total claims paid.
