The implicit subsidy was estimated based on the ratio of the blended pre-65 retiree premiums to the full cost pre-65 retiree premiums as determined by the Plan's health care actuary, and the projected gross pre-65 retiree costs from the fiscal 2020 and fiscal 2021 GASB 75 actuarial valuations.

Employer allocations are based on the employer contributions provided by the State for the "measurement" period applicable to each fiscal year.

Please see the fiscal 2020 and fiscal 2021 actuarial valuation reports for a summary of the census data, plan provisions, and actuarial assumptions used in the calculations.
